“The Circle of Health”
The Evolution of a Progressive Dental Practice

- The time is right to embrace Wellness Dentistry
- Learn the science to excel business success
- Understand the comprehensive nature of the oral systemic link
No matter how many years you have been practicing dentistry, it is the right time to be progressive by embracing Wellness Dentistry and the Oral System link.

Together we will review the relevant science behind the key to oral and overall health – controlling inflammation.

Specifically, we will tackle:
- Diagnosis
- Techniques
- Technology
- Therapy to periodontal disease and dental infections.
In addition, we will teach attendees to place their detective hats on to hunt for subtle signs and symptoms of disease in the Head & Neck region.

These concepts will empower Dental Professionals to be confident in co-managing partners of their patient’s health care team.
LEARN THE SCIENCE BEHIND WELLNESS DENTISTRY!
